

INFORMATION TECHNOLOGY AND AWS ADMIN INTERN

Experience

Information Technology and AWS Admin Intern , 04/2019

Company Name – City , State

- Researched and implemented a secure cloud infrastructure for migrating the financial data into AWS with seamless integration for company's financial department.
- Achieved an overall increment of 30% in efficiency by migrating the company's infrastructure to AWS cloud.
- Reduced the company's infrastructure cost by 10 times.
- Implemented secure off-site backups through scheduled weekly SSH dumps to remote server.
- Configured and troubleshoot switches, routers and firewalls using TCP/IP protocols.

Network Engineer Intern , 10/2015

Company Name

- Built LAN and WAN for small-scale business enterprises using HTTP, DHCP, DNS, OSPF, VLAN.

AWS Certified Solutions Architect- Associate , 10/2018

Company Name – City , State

- ID-J007G7C1MFE41RSQ) Aug 2019 Cisco Certified Network Associate - CCNA 200-125 (ID-CSCO13264710.

04/2019

Company Name

- Set up a VPC network on Amazon and created public and private subnets, security groups, elastic IP and NAT gateway.
- Created an EC2 instance with Windows AMI to host an application on virtual machine WAN network deployment for a multinational organization using Cisco Packet Tracer Fall 2018.
- Configured routers, switches and implemented IP addressing, subnetting for a multi-location enterprise network using DHCP, OSPF, HSRP, RSTP for routing and redundancy.
- Solved security threats by providing network security using ACL and port security Linux Based Integrated Ad-Hoc Network for IT infrastructure (Linux, Ubuntu) Fall 2018.
- Designed and implemented a prototype illustrating a client-server model for hosting WebServer (Apache2), master and slave.

Work History

Information Technology and AWS Admin Intern , 04/2019

Company Name – City , State

- Researched and implemented a secure cloud infrastructure for migrating the financial data into AWS with seamless integration for company's financial department.
- Achieved an overall increment of 30% in efficiency by migrating the company's infrastructure to AWS cloud.
- Reduced the company's infrastructure cost by 10 times.
- Implemented secure off-site backups through scheduled weekly SSH dumps to remote server.
- Configured and troubleshoot switches, routers and firewalls using TCP/IP protocols.

Network Engineer Intern , 10/2015

Company Name

- Built LAN and WAN for small-scale business enterprises using HTTP, DHCP, DNS, OSPF, VLAN.

AWS Certified Solutions Architect- Associate , 10/2018

Company Name – City , State

- ID-J007G7C1MFE41RSQ) Aug 2019 Cisco Certified Network Associate - CCNA 200-125 (ID-CSCO13264710.

04/2019

Company Name

- Set up a VPC network on Amazon and created public and private subnets, security groups, elastic IP and NAT gateway.
- Created an EC2 instance with Windows AMI to host an application on virtual machine WAN network deployment for a multinational organization using Cisco Packet Tracer Fall 2018.
- Configured routers, switches and implemented IP addressing, subnetting for a multi-location enterprise network using DHCP, OSPF, HSRP, RSTP for routing and redundancy.
- Solved security threats by providing network security using ACL and port security Linux Based Integrated Ad-Hoc Network for IT infrastructure (Linux, Ubuntu) Fall 2018.
- Designed and implemented a prototype illustrating a client-server model for hosting WebServer (Apache2), master and slave.

Accomplishments

- DNS(Bind9) server, DHCP Server and Backup server.
- Integrated the network to release dynamic IPv4 and IPv6 addresses to provide firewall protection, NFS, IPsec VPN Multi-client server chat application Spring 2018.
- Developed a real time multi-client server chat application in Python for a chat group by implementing socket programming.
- Secured the application by providing features like AES encryption, SHA 256, MD5 and symmetric key method Client server Socket Programming using TCP in Python Fall 2017.
- Developed a Python script for the client on Linux for performing a set of mathematical expressions sent by the server.
- Evaluated the result by receiving a flag sent by the server to the client on successful execution of the mathematical expressions, indicating a secure and successful TCP socket client-server connection establishment SDN based Load Balancer Fall 2017.
- Designed a software-defined network to provide server load distribution for a pool of HTTP servers by analyzing the incoming packets and routing accordingly.
- Optimized congestion by performing load balancing in round robin technique for the POX controller by using Openflow Switch Client - server application for public-key cryptography in Python Fall 2017.
- Developed a secured TCP connection for encryption and decryption of text file and matched the output at the receiver.
- Created public key cryptography to generate a set of public and private key (.pem file) by using RSA cryptosystem

Education

Master of Science : Telecommunication and Networks , 12/2019

Northeastern University, Solapur University - City , State

Bachelor of Engineering : Electronics and Telecommunications , 06/2016

Summary

Actively seeking full time opportunities from December 2019

Highlights

- IP networking protocols :TCP/IP,UDP,HTTP/S,DHCP,DNS,STP,HSRP,ISIS,RIP,OSPF,MPLS,FTP,SMTP,IPSec,VLAN,VPN
- Network Tools :Wireshark,VMware,Cisco Packet Tracer,VirtualBox, Oracle,Windows Server,AWS,Active Directory
- Operating Systems :Windows,Linux,CentOs,Ubuntu,RHEL
- Programming languages: Python,Bash Scripting
- Coursework : Data Networking, Linux for Network Engineers, Internet Protocols & Architecture, Network Security,
- Computer Communication Networks, Multimedia Communication
- Active Directory, Routers
- Ad, Routing
- Apache2, SSH

- Bash, Scripting
- CCNA, SMTP
- Cisco Certified Network Associate, Switches
- Cisco, TCP/IP
- Client-server, VPN
- DHCP, WAN
- DNS, Windows Server
- Financial
- Firewalls
- FTP
- Gateway
- HTTP
- Internet Protocols
- IP
- ISIS
- LAN
- Linux
- Windows
- Multimedia
- Enterprise
- Network Security
- Network
- Networking
- Networks
- Operating Systems
- Oracle
- OSPF
- Programming
- Protocols
- Python
- RIP

Skills

- IP networking protocols :TCP/IP,UDP,HTTP/S,DHCP,DNS,STP,HSRP,ISIS,RIP,OSPF,MPLS,FTP,SMTP,IPSec,VLAN,VPN

Information Technology System Administrator

Pair PAIR_28 | Job description | Source record 3901941877

THE IT SYSTEM ADMINISTRATOR POSITION WILL SUPPORT THE CURRENT SERVER MIDDLEWARE AND SOFTWARE ENVIRONMENTS. THIS POSITION WILL BE REQUIRED TO COORDINATE WITH TEAMS IN SUPPORT AND ADMINISTRATION OF SERVERS SUPPORTING THE CLIENT'S ENVIRONMENT. THIS POSITION WILL ALSO SUPPORT TECHNICAL TEAMS ON PROBLEM RESOLUTION, UPGRADES, PATCHING, AND OTHER TASKS WITH MIDDLEWARE AND 3RD PARTY APPLICATIONS. THIS POSITION WILL OFFER INPUT TO ESTABLISH SHORT-TERM AND LONG-TERM STRATEGIC NEEDS FOR THE ACTIVE DIRECTORY ENVIRONMENT AND SUPPORTING COMPONENTS.

REQUIRED SKILLS, QUALIFICATIONS, AND EDUCATION:1-3 YEARS' EXPERIENCE MANAGING CURRENT SERVER OPERATING SYSTEMS INCLUDING MICROSOFT AND LINUX.1-3 YEARS' EXPERIENCE MANAGING MICROSOFT ACTIVE DIRECTORY AND ITS COMPONENTS.UNDERSTANDING OF ACTIVE DIRECTORY REPLICATION, DNS, DHCP, SITE LINKS, SITE TOPOLOGY, GROUP POLICY, GLOBAL CATALOGS, AND OTHER CORE INFRASTRUCTURE COMPONENTS REQUIRED.KNOWLEDGE AND UNDERSTANDING OF KERBEROS AND NLTM, LDAP AND SAML PROTOCOLS.PREFERRED EXPERIENCE WITH MULTI-FOREST ACTIVE DIRECTORY ENVIRONMENTSKNOWLEDGE UTILIZING POWERSHELL IN CONFIGURATION AND ADMINISTRATION OF MICROSOFT SOLUTIONS IS A MAJOR PLUS.HANDS-ON EXPERIENCE WITH WINDOWS AND LINUX ENVIRONMENTS, BOTH SERVER AND CLIENT BASED.ABILITY TO DIAGNOSE AND TROUBLESHOOT COMPLEX TECHNICAL ISSUES.
